	99	0	"	"	Microhyla		

Fingers reach, end much more obtuse than toe pads
Terminal articulation reaching just beyond ungual
Pads rarely touching

Large Polypedates (778)

Color (Brought dead):

Brilliant living grass green
Head back onto arms & body (darker or paler tinged)
Dorsal gray bluish under the green cover, as is
at sides behind tympanum and across in front of
the legs. Belly white. Top of head and dorsal back with
about eight irregularly placed roughly round rich brown spots
edged with pale ochraceous. Each side of body with several
white spots edged with brownish black & similar band above and
below anus. Outer side of fore-arm and entire with a white stripe, edged
narrowly above, and broadly & irregularly below with dark brown. Foot with a similar stripe
from tarsus of heel to end of last toe, & toe similarly colored practically.
